B.S., University of Maryland, 1994

Brian is Program Manager/Team Lead of the U.S. Environmental Protection Agency's Landfill Methane Outreach Program (LMOP), a voluntary program that encourages methane emissions reductions through the capture and beneficial use of landfill gas.

Brian's primary role is to manage Territory 3, comprised of Arkansas, Arizona, California, Louisiana, Nevada, New Mexico, Oklahoma, Oregon, Texas, and Washington. As program manager, Brian works to create alliances between the LMOP and states, utilities, landfill owners and operators, communities, and the landfill gas industry. Brian also assists project development by helping landfills find beneficial end uses for the landfill gas, and by providing technical and marketing assistance at all stages of the development process. In addition to his territory activities, Brian manages the day to day operations of the four person LMOP Team.

Prior to joining the LMOP, Brian was Technical Divisions Manager for the Solid Waste Association of North America (SWANA) from 1994 to May 1999. He was responsible for coordination and oversight of activities for SWANA's seven Technical Divisions, including regulatory and legislative analysis, delivery of specialty symposia, awards programs, newsletter production, and management of two program managers and interns.
